RESEARCH AREAS

Research themes :

General

- Social and cultural studies of science, technology and medicine

- Cultural history of processes of medicalization, industrialization and nuclearization
- Transformations of environment, nature and the reproductive body by techno-industrial and/or bio-medical innovations
- Technology criticism and production of alternative knowledges and practices within feminist and ecological movements
- Risk management, ignorance production, and forms of reparation related to industrial and medical 'harm'

Current Research

- Since 2017. 'From care to violence? Feminist reactions to biomedicalization of childbirth and reproductive health in France (1970s-2010s).'
- This research is at the core of my professorship dissertation in-progress. Its completion (as a monograph) is envisaged for mid-2022.

Past (recent) Research

- 2018-2020. Reproductive Health and Ignorance Production
 - Main publication: Special journal issue for Reproductive Biomedicine and Society Online (forthcoming, 2021)
